(FOR IMMEDIATE RELEASE)

**OXFORD INNOTECH DELIVERS RM50.5 MILLION  
REVENUE FOR 9MFY25***~ Phase 1 of Penang Science Park ("PSP") Factory 2 starts mass production*

**Kuala Lumpur, 21 November 2025** – Integrated engineering solutions provider, Oxford Innotech Berhad ("OXB" or the "Group") (牛津科创有限公司), has today announced its third quarter ("3QFY25") and nine months ("9MFY25") financial results for the period ended 30 September 2025. As this represents OXB's third interim financial announcement since its listing on the ACE Market of Bursa Malaysia Securities Berhad ("Bursa Malaysia"), there are no corresponding comparative figures for the preceding year.

For 3QFY25, the Group achieved a revenue of RM13.9 million and recorded a profit after tax ("PAT") of RM1.2 million, which included approximately RM0.9 million in one-off listing expenses. Excluding the non-recurring listing expenses, the normalised PAT would have been RM2.1 million, representing a normalised PAT margin of 14.9%.

For 9MFY25, Group revenue came in at RM50.5 million, with a reported PAT of RM6.1 million. Adjusting for listing-related expenses, normalised PAT stood at RM7.3 million, translating into a normalised PAT margin of 14.5%. The Group also generated a positive net operating cash flow of RM16.2 million during the nine-month period.

Segmentally, the mechanical assembly solutions segment contributed RM29.9 million, accounting for 59.1% of total revenue in 9MFY25, followed by precision engineering components solutions at RM19.3 million (38.3%), and automation and robotics solutions at RM1.3 million (2.6%).

Geographically, Malaysia remained the key market, representing 94.7% of total revenue, primarily driven by multinational customers with operations in Malaysia. The

remaining 5.3% came from other Asian markets, along with contributions from the North America and Europe.

**Managing Director of OXB, Mr. Ng Thean Gin (黄天仁)**, commented, “The first nine months’ performance is within our expectation, with some exciting developments through our strategic partner, JAKA Robotics Co. Ltd (“JAKA Robotics”), a global player in collaborative robotics. During the quarter, we successfully deployed two projects using JAKA robots — one for a semiconductor client and another for a telecommunications customer.”

Mr Ng further added, “Operationally, we are seeing good momentum in our First Article Inspection Reports (“FAIRs”) approval pipeline, mainly coming up from the semiconductor industry. In fact, a number of the approvals have gone into mass production recently. We are certainly gaining good traction and are on track to receive more orders in the coming months. With a healthy pipeline and a solid conversion into mass production orders so far, we expect meaningful contribution to the Group’s top-line in the coming quarters.”

A FAIR approval is the process through which customers evaluate and approve the company’s initial sample parts, which is required before proceeding with larger production orders.

“In parallel, Phase 1 of our new facility at Penang Science Park (“PSP”) Factory 2 commenced mass production during the quarter. The new facility adds 39,392 square feet (“sqft”) of manufacturing area, increasing our total production floor space to 125,174 sqft.”

“On the global front, we are closely monitoring the potential implications of the reciprocal tariffs imposed by the United States (“US”). Our direct exposure to the US market remains minimal and has not affected our order flow. We will continue to keep a close watch on any potential spillover effects on the supply chain. All in all, we remain cautiously optimistic about the outlook for the industries we serve, particularly

semiconductor, electrical and electronics (E&E), automotive, and modular building systems (MBS).”

On balance sheet strength, OXB remained in a net cash position, supported by a net asset per share of 18 sen as at 30 September 2025.

To recap, OXB was successfully listed on the ACE Market of Bursa Malaysia on 29 July 2025, raising RM41.6 million, primarily earmarked for capacity expansion and capability enhancement to support future growth.

-end-

### **About Oxford Innotech Berhad**

Headquartered in Penang, Oxford Innotech Berhad (“**OXB**”) (stock code: OXB/0368), through its subsidiaries, is an integrated engineering solutions provider specialising in precision engineering components solutions, mechanical assembly solutions, and automation and robotic solutions. OXB’s customers comprise primarily multinational and local manufacturers and assemblers across various industries, including semiconductor, electrical and electronics, automotive, and modular building systems.
